

Sabin Bee-Friendly Front Garden Tour

Did you know that bees pollinate crops as diverse as blueberries, pumpkins and onions? They are also essential for pollinating alfalfa and other crops that farm animals eat. In many areas, bees are at risk from pesticide use, habitat loss and introduced diseases.

Here's how you can help ensure healthy populations of bees and other pollinators:

- Garden without pesticides
- Grow flowers that provide pollen and nectar throughout the spring, summer and fall
- Leave some bare ground for native bees to nest or provide nesting boxes
- Buy organic food

To see examples of bee-friendly gardens, **take the Sabin Bee-Friendly Front Garden Tour**. It's free and it's self-guided, so you can take the tour any time – spring, summer or fall. More info is available on the Sabin Community Association website (sabinpdx.org) or contact Diane Benson at dcb1810@yahoo.com.

Selection of our Participating Gardens

Tim and Julie	4234 NE 21st Ave
Joan	3948 NE 20th Ave
Jeanne	1633 NE Going St
Melissa and Brett	2017 NE Skidmore
Mandi and Steve	1533 NE Skidmore
Erika	4045 NE 19th Ave
Buddy and Karie	3907 NE 19th Ave
Connie	2013 NE Ridgewood Dr
Bob and Ron	1932 NE Ridgewood Dr
Sabin Community Orchard	NE 18th and Mason
Linda	3946 NE 18th Ave
Marc	4745 NE 16th Ave
Suki	3934 NE 16th Ave
Susana	3906 NE 16th Ave
Marseile	4105 NE 15th Ave
Carolyn	4821 NE 14th Ave
Matt and Kristin	4057 NE 14th Ave
Kathy	3916 NE 14th Ave
Carol	4003 NE 13th Ave
Morgan	3967 NE 13th Ave
Kristin	1234 NE Failing Ave
Diane and Scott	3926 NE 11th Ave
Vanessa	3727 NE 11th
Erin	1508 NE Beech St
Ariadne Garden	NE 11th Ave between Fremont and Beech
Bess and John	3910 NE 10th Ave
